Math 121

Exam 2

Fall 2026, (Chapter 5-7 in Gould & Ryan, 2nd.)
October 15-16, 2026
S. K. Hyde Name: _____

Directions

1. You can have a letter sized handwritten page of notes. However, the handwriting must be yours! You need to write it down - no one else can do it for you.
2. ChatGPT or any other AI help is disallowed on the exam. It would be considered cheating if you use it on the exam and you may receive an automatic F on the exam if you use it.
3. You can use a scientific calculator or a graphing calculator. You may also use the Desmos scientific calculator online at `http://desmos.com/scientific`. You can also use graphing option: `http://desmos.com/graphing`. Open them up before starting your exam. Same goes for StatCrunch – start it in a separate window before beginning the exam.
4. You may use the Online TI-84 calculator at: `https://jekyllmath.xyz/courses/m107/sp25/ticalc.shtml`
5. Open up the exam "Exam 2 ENTRY POINT" in Canvas and begin the exam. Please read the rest of the directions before proceeding.
   - The second question on the exam in Canvas has the password for the exam on MyMathLab.
   - Do not submit the exam on Canvas until the MyMathLab exam is done.
   - When the MyMathLab exam is complete, please sign the coversheet and witness that you were honest for the exam (link in first question), and then upload as the answer the question in Canvas.

Honor Statement

Sign the following statement indicating that you have been honest in your commitment to not receive help from anyone or cheat in any way on the exam.

I, *print your name:* _____, have been honest as I took this exam. I did not discuss any problem or ask for help from any classmate, professor, tutor, monkey, dog, peanut butter jar, random person on the internet etc. , nor have I asked ANYONE or ANYTHING (an iPhone, Android phone, smartphone, Artificial Intelligence, or anything on the internet, including, but not limited to YouTube, wikipedia, Khan academy, Google, ChatGPT, any other AI, etc. (this is not a comprehensive list - I have only given a short example of things that you shouldn't consult - This doesn't include Brother Hyde) besides Brother Hyde. I realize that breaking this commitment is breaking the honor code, which I have signed I would uphold.

Signed: _____ (1 pt. if signed honestly)

Various Formulas

$$P(A^c) = 1 - P(A) \qquad P(A \text{ and } B) = P(A)P(B|A) = P(B)P(A|B)$$

$$P(B|A) = \frac{P(A \text{ and } B)}{P(A)} \qquad P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$$

$$z = \frac{x-\mu}{\sigma} \qquad \mu = np \qquad \sigma = \sqrt{np(1-p)} \qquad \hat{p} \sim N\left(p, \sqrt{\frac{p(1-p)}{n}}\right)$$

$$\hat{p} \pm m \qquad m = z^* SE_{\hat{p}} \qquad SE_{\hat{p}} = \sqrt{\frac{\hat{p}(1-\hat{p})}{n}} \qquad n = \left(\frac{z^*}{m}\right)^2 \left(\frac{1}{4}\right)$$

$$(\hat{p}_1 - \hat{p}_2) \pm m \qquad m = z^* SE_{\text{est}} \qquad SE_{\text{est}} = \sqrt{\frac{\hat{p}_1(1-\hat{p}_1)}{n_1} + \frac{\hat{p}_2(1-\hat{p}_2)}{n_2}}$$

Conf Level	99%	95%	90%	80%
z^*	2.576	1.960	1.645	1.282

Table entry for z is the area under the standard Normal curve to the left of z
